Prateek Mehta

MBA - Business Analyst/PM

"My career has taught me that my strength lies in bringing structure to ambiguity — I understand problems deeply, simplify them for teams, and create solutions that improve how people work. I feel most useful when I'm helping teams work smarter, not harder."

Business Analysis and Transformation leader with 8+ years of experience driving multi-country workflow redesigns, operational scalability, and data-driven decision-making across financial services. Known for bringing structure to ambiguity, aligning cross-functional teams, and shaping solutions that improve efficiency, strengthen controls, and deliver measurable business impact — now stepping into Product Management to lead strategy, execution, and user-centric innovation.

- Data Science for Business Leaders (XLRI)
- ML/Data Science Foundation
- AI Agent Builder (n8n)
- Excel Skills for Business (Macquarie)
- Power BI Desktop (Coursera)
- Foundations of Business Analytics (Great Learning)

Experience

2025 - Present
Marsh McLennan India Pvt Ltd, Mumbai
Senior Manager – Business Analysis

Transformation Office | EU Process Efficiency Team

- Led multiple transformation initiatives across process improvement, internal controls, and centralization, partnering with country teams, CoEs, and technology stakeholders.
- **Process Improvement**: Analyzed the Year-End Premium Adjustment process across top 5 EU countries, identified workflow variations, and defined target solutions, delivering **~30% efficiency improvement** in processing.
- **Centralization**: Assessed feasibility of transitioning the Placement Data Capture process spread across **20+ countries** to centralized CoEs; defined the Target Operating Model (TOM) and aligned leadership across markets to initiate transition.
- **Internal Controls**: Designed a role-based Access Authorization Framework for the mass upload invoicing system to strengthen risk and compliance controls; coordinated implementation with IT for **500+ users** across EU regions.

2023-2025
Standard Chartered GBS, Chennai
Manager - Process Standardization

Continuous Improvement | Operational Efficiency | Global Banking Operations

- Led discovery and requirement definition for automation of client communication workflows, reducing manual work by **30 HC** and improving turnaround and accuracy.
- **Increased process reliability and reduced operational inconsistencies** by standardizing workflows across CDD, Servicing & Transactions (S&T) operations.
- Partnered with technology teams to validate feasibility, define user stories, and support deployment of automation for the top 5 global markets.
- Improved cross-functional alignment by partnering with risk, operations, and technology teams to embed efficiency and control enhancements in BAU processes.

2017 - 2022
Tata Consultancy Services, Mumbai
IT Business Analyst

Digital Product Delivery | Insurance Clients | Agile SDLC

- **Delivered 100+ New Business** enhancements by analyzing requirements, prioritizing by value/effort, and partnering with engineering and QA.
- **Achieved up to 30% cost savings** by digitizing the end-to-end insurance purchase journey and eliminating manual, document-heavy steps.
- **Boosted customer satisfaction by 10%** by redesigning user flows and removing friction points within the onboarding and policy purchase processes.
- **Cut manual testing effort by 50% (1200 hours/year)** by introducing an automation testing framework, improving release quality and delivery speed.
