Prateek Mehta

Founding Product Manager · XLRI · Product · BFSI · AI Native

Mumbai · prateek.milestoneindia@gmail.com · +91 83690 82848 · linkedin.com/in/prateek-mehta-xlri · proisback.github.io/my-portfolio

An accomplished Product Manager with **8+ years** of experience, specializing in transforming complex operational and regulatory challenges in the banking and insurance sectors into actionable product requirements, strategic roadmaps, and successful system capabilities. Owns the complete product lifecycle (user research and problem definition, PRDs, prototypes, roadmap trade-offs, UAT, and launch), collaborating with engineering, operations, and QA in global matrix environments. Transitioned from Business Analysis into hands-on 0-to-1 product development, shipping **9** products in **2026** with generative AI tools, including a live consumer beta. Proficient with Figma, APIs, and SQL.

Work Experience

Founding Product Manager · Gal Pal (galpal.in)

Apr 2026 – Jul 2026

- Owned 0-to-1 discovery-to-launch for a safety-first women's friendship app: authored the full PRD, ran **30+** user-insight sessions, and shipped to a live Product Hunt launch in **4 days** as part of a **6-person** team.
- Designed the product's core trust layer (mandatory human-led video/phone verification before matching), blocking **34** fraudulent sign-ups pre-launch without adding friction for real users.
- Directed a **6-person** build (Next.js, Supabase, Vercel, PostHog) in **14 days**, owning UX/visual design and QA.
- Drove a **60%** increase in **user retention** by applying **user research** to the UX, tracking KPIs in **PostHog**.
- Ran **A/B tests** and **competitor analysis** to refine features, improving engagement metrics by **40%**.

Senior Manager, Business Analysis · Marsh McLennan India

Mar 2025 – Dec 2025

- Harmonized the Year-End Premium Adjustment process across **5** EU markets by isolating regulation-driven variation from legacy habit, cutting processing effort by **~30%**.
- Aligned **5** country leads with conflicting priorities around one target-state workflow, turning a stakeholder standoff into a repeatable harmonization framework the EU team now reuses.
- Centralized placement data capture for **20+** markets into a Warsaw Centre of Excellence, defining the operating model for **~200** users and freeing **~3 FTE**.
- Built the access-authorization framework for mass-upload functionality used by **500+** users, translating compliance risk into enforceable system controls.

Manager, Process Standardization · Standard Chartered GBS

Jun 2023 – Mar 2025

- Split client-communication workflows into rule-based vs. judgment-based steps across CDD, Servicing & Transactions, then standardized the process before automating it.
- Sequenced automation across the top **5** global markets by volume, complexity, and readiness, saving **30 FTE**.
- Automated rate-booking eligibility rules, cutting manual touchpoints **50%** and turnaround to under **48 hours**.
- Treated change management as core rollout scope after seeing unconvinced ops teams build shadow processes.

IT Business Analyst · Tata Consultancy Services

Mar 2017 – Jun 2022

- Ran **3** parallel improvement tracks over **5 years:** prioritizing **100+** backlog enhancements by value vs. effort, digitizing the purchase journey, and building test automation for **~30%** cost savings and a **10%** CSAT lift.
- Cut manual testing effort **50%** (**~1,200** hours/year) with an automation framework, speeding releases.
- Digitized manual, document-heavy onboarding steps, reducing **customer dropoff** by an estimated **90%**.
- Partnered with engineering and QA across Agile sprints, writing user stories, acceptance criteria, and defect specs from requirements through UAT and release validation.

Projects

Hitaarth
- Launched a quote-sharing app and grew engagement **200%** over **2** months, serving **48** unique visitors weekly.
- Shipped a live daily-reading PWA with **669** ideas in **4** languages: offline-first, zero dependencies, no sign-up.
- Drove **~420** visits from **4** countries via WhatsApp Status, tracking the funnel with cookieless analytics.

RepLedger
- Solo-built a dues, renewals and QR check-in app for Indian gyms in **1 week**, with one-tap WhatsApp reminders.
- Cut screen loads from **2–3.5 s** to under **1 s** by moving server functions beside the database; **481** automated tests.

BOQ से Quote तक
- Built AI-assisted BOQ parsing with catalogue-only matching and a deterministic fallback for WhatsApp quotes.
- Repositioned the quote as the bridge to a showroom visit, with one KPI: BOQs that become showroom visits.

PMPathfinder
- Built a **3-stage** PM-readiness platform (archetype diagnostic → adaptive AI-scored practice across **6** PM dimensions → real-job gap analysis) for aspiring PMs.
- Ran a **38-person** survey and **6** interviews, synthesized **3** personas, and scoped **7** must-haves via MoSCoW.
- Designed a **5-slot** adaptive scoring engine calibrated against score inflation for consistent AI evals.

Plan Karo Chalo
- Ran **132+** pieces of primary research (**105** surveys + **27** interviews) that overturned the starting hypothesis behind why **35%** of group trips never happen.
- Cut **4** feature categories on research evidence, then solo-built a link-based coordination PWA in **8 days**.
- Drove **91.7%** activation and **85.2%** 48-hour response, cutting time-to-lock-dates to **1.5 days** vs a **5-day** target.

Bhojan
- Shipped a full meal-planning app for Indian vegetarian families in **4 days** with zero prior coding background (autosuggest engine, festival calendar, WhatsApp grocery lists) at **$0** infrastructure cost.
- Pivoted the product from planner-first to suggestion-first after **1** user interview revealed the original UI recreated the decision fatigue it was meant to solve.

StoreOps Peak-Hour Decision Support · Blinkit
- Quantified a **₹3.16 Cr**/store annual margin-loss problem by synthesizing **392** reviews, **11** first-person accounts, and a primary store-manager interview.
- Designed a real-time decision-support module that re-routes existing scanner data (zero new hardware), with one-tap interventions readable in under **5 seconds**.

Signal
- Ran **6** founder interviews and reviewed **80+** sources on CRM adoption, overturning the starting hypothesis.
- Co-authored the PRD: a **4-state** deal model and rule-based commitment extraction ranking daily actions.

Education

MBA / PGDM General Management, XLRI Xavier School of Management, Jamshedpur — 2022 – 2023

Bachelor of Engineering, Information Technology, University of Mumbai — 2012 – 2016

Skills
